## WYFL 8-on-8 Flag Hybrid Football

Attention 4th & 5th Graders, sign up today for the WYFL's 8-on-8 traveling flag football team. If your child is interested in learning more about how to play football, our Hybrid flag football league is a perfect way to learn the sport, without the fear of injury from full contact. This is still flag football, just with pads and a helmet. Your child will receive full pads, a helmet, a jersey and flags, so they can get used to being athletic with the extra weight of the pads and a helmet.

Our goal is to provide a positive, fun, and safe environment that allows our athletes to learn fundamentals, develop skills, and build character, good sportsmanship, self-esteem, discipline, and leadership. We build a foundation for success with a "win the day" goal mentality for personal and team development that will carry with them for life. Our program is not about focusing on wins and losses. Our expectation for every player is simply to listen and give their best effort so they can grow stronger physically and mentally every day. Football is an outstanding sport to build these great character traits. Every season is filled with peaks and valleys that they will experience together with their teammates. We hope this bond and the friendships that are created last into high school and far beyond.

Games will be played on Saturdays at Whitewater High School, UWW Perkins Field, and other communities participating in the league. Due to high demand and scheduling concerns, we must limit player enrollment. First come, first serve. The Registration fee is \$150. Don't wait, sign up today!

### Lakes Drawdown and Dredging Project

The Lakes Drawdown and Dredge Project that began on July 8, 2019 with the drawing down of the lakes has been extended another year. After the first season of the drawdown Cravath Lake has been fully drawn down. Trippe Lake will need another season of drawing down to get to the lowest level possible. To help with the drawdown of Trippe Lake, siphons were added over the spillway this past summer. This will increase the flow out of the lake allowing the lake to continue drawing down over the next year.

The dredging phase of the project is scheduled to take place the winter of 2021/2022. Both lakes will be drawn down through this entire process and would be refilled in the spring of 2022. The hope is to improve water quality and depth, reduce aquatic vegetation and eliminate certain invasive aquatic plant species.

Please follow our website [www.whitewater-wi.gov](http://www.whitewater-wi.gov) for more information as this exciting project begins.

root balls at the compost site. The City reserves the right to not collect brush for just cause. You may also submit a Brush Collection request at <https://www.whitewater-wi.gov/RequestTracker.aspx>

## Tree Trimming

If you have a tree that is hazardous, diseased or dead within the public road right-of-way, contact the Public Works Department at 262-473-0560. There is no charge for this service. You may also submit a tree-trimming request at <https://www.whitewater-wi.gov/RequestTracker.aspx>.

Are you unsure whether a tree on your property belongs to the City or you, the property owner? City owned trees are located in the terrace, which is the area between your sidewalk and the curb. However, there are many areas in the City of Whitewater that do not have sidewalks. If you are in that situation, please call the Forestry Department at (262) 473-0560 and they will determine if the tree belongs to you, or the City.

Per the City's Municipal Code, it is a violation for anyone, other than the City, to remove a City tree. Violators can be fined and charged replacement costs to have the tree replaced.!

## Compost Site

The compost site is available to City of Whitewater residents only. It is located at 599 N. Jefferson Street. Residents may bring yard waste to the site for disposal. The compost site will open when the weather allows in late March/early April. The compost site is open on Wednesdays from 3 p.m. to 7 p.m. and Saturdays from 8 a.m. to 2 p.m. In the fall, the hours are 2 p.m. to 6 p.m. on Wednesdays due to shortened daylight hours. Residents are required to empty the yard waste from any container used in the transportation of the yard waste and take the container(s) home. Residents can also help themselves to composted material or wood chips at the site. Residents must load their own compost or wood chips. The City will provide a loader for loading chips and compost into resident's trailers and trucks on the first Saturday of every month until the site closes for the season. Please allow enough time to unload and exit the gate before the posted closing time.

Brush will not be collected as part of the yard waste collection. For more information, visit the City's website at [www.whitewater-wi.gov](http://www.whitewater-wi.gov).

## Winter Parking Hours

(a) It is unlawful for the operator or owner of any vehicle to park the vehicle on any street in the city between the hours of 2 a.m. and 6 a.m. on any day from November 1st of each year to March 31st of each year, except as hereinafter provided:

## Storm Water Catch Basins

Fines and/or penalties will be imposed on those who are caught unlawfully dumping any substance into storm water catch basins. Substances like household chemicals, grass clippings, leaves, fertilizers, insecticides, automotive fluids, oils, paints, pet waste and commercial waste are prohibited. Anything dumped into the storm water catch basins travels through storm drains to local streams and rivers. These pollutants harm water quality and can kill aquatic life. Residents are encouraged to report illegal dumping by calling the Public Works Department at 262-473-0560.

## Become a Storm Water Drain Protector

The City of Whitewater is part of the Rock River Storm Group (RRSG), a group of surrounding communities committed to improving the health of the Rock River and other local waterways. As part of this effort, we have teamed with a marketing group from UW Whitewater who helps the RRSG get the word out on activities to protect Wisconsin Waterways. One such activity is to become a Storm Drain Protector. By becoming a Storm Drain Protector you agree to help prevent pollution from reaching storm drains by keeping the area around the storm drains free of debris and pollutants. To sign up to be a Storm Drain Protector, or to find out about other activities and chances to win prizes go to [www.protectwiwaterways.org](http://www.protectwiwaterways.org).

## Wastewater Department

The Wastewater Utility returns all consumed water within the City of Whitewater back into the environment in a responsible fashion that meets or exceeds State and Federal regulations. In order to do so, utility staff is tasked with maintaining and operating the public conveyance system or the "collection system" along with the treatment facility and its associated programs.

## Coping with a Sewer Backup

If you experience a sewer backup Monday through Friday, between the hours of 7:00 a.m. - 3:30 p.m., call the Wastewater Utility at 262-473-0560. If outside of these hours, please call Police Dispatch at 262-473-0555, option 4. We will dispatch a maintenance crew to your address and determine if the blockage is in the public system or your private line (sewer lateral). If the sewer main is found to be clear, it is the responsibility of the property owner to correct the problem. The City cannot recommend a plumber; however, a list of area businesses that provide this service is available. We do recommend residents obtain multiple quotations and check references prior to having the work done. If the blockage is in the City system, we will fix it as quickly as possible and keep you informed about what is being done.

## Sanitary Sewer and Water Lateral

**Insurance Coverage.** If a failure occurs in the sanitary sewer or water lateral, between your home and the public utility connection, it would be your responsibility, as the homeowner, to pay for any repairs. The public connection for sanitary sewer laterals is at the sanitary sewer main, typically in the middle of the street. The public connection for water laterals is at the water shut off valve, typically near the sidewalk area. We recommend residents communicate with their homeowner insurance carrier to learn more about coverage options.

## No Wipes Down the Pipes

Even if a product says it is flushable, do not flush it down the toilet. Only toilet paper should be flushed! The following items should be placed in a trashcan: flushable/disposable cleaning or baby wipes, paper or cloth towels, any type of rags, feminine hygiene products and facial tissues. Putting these items down toilets may plug sewers and cause raw sewage to back up into your and your neighbors' homes.

## Help Us Maintain Healthy Pipes

Grease Concerns - In order to maintain reliable sanitary sewer services for public health and safety, grease should never be put down pipes. Grease and sand can settle out and possibly solidify as it would in a pot or pan in your household. Over time this causes the sanitary line (your private line or the public mainline) to become smaller and smaller. The result is a blockage in the line, which will result in sewage in your home, business, your neighbors' home or overflowing the system into the environment.

## Clean Water Concerns

Roof drains, sump pumps, and/or foundation drains connected to the City's sanitary sewer system is illegal. These cross connections send groundwater or rainfall to the Wastewater Treatment Plant, consuming valuable treatment capacity. Please familiarize yourself with your house plumbing system. You may be contributing to the problem if you have roof downspouts that are piped underground, a sump pump that has no identifiable discharge point, or foundation drains that do not discharge to a low point on your property. Residents must disconnect unlawful connections to the sewer system. You may contact the Public Works Department at 262-473-0560 to find reasonable alternatives.

## Drug Drop Box

A prescription drug box is conveniently located in the Fremont Street foyer of the Whitewater Municipal Building at 312 W. Whitewater St. and is accessible during normal business hours. This is in place to encourage the proper disposal of medical and prescription waste. This free service is available to all residents of Whitewater. Most medical substances cannot be removed through normal water-treatment processes. If not disposed of properly, this would result in the discharge of substances into the environment.

## New Water Tower

The City is in the process of designing a new water tower to replace the existing Starin Park water tower and ground reservoir. After the new water tower is operational, the 120 plus year old water tower and 120 plus year old ground reservoir will be decommissioned and taken out of service. At this time, there is no plan to demolish the existing Starin Park water tower.

The new water tower will be located on the south side of Highway 12, just east of Indian Mound Parkway, adjacent to the Water Utility's Well #9. Construction is anticipated to begin in late summer/early fall with a completion date of October 2022. The new water tower will be similar in shape to the City's other water tower located on Cravath Street.

## Selling Alcohol

It is against the law to charge for alcoholic beverages at the door of a party, charge for alcoholic beverages in a package deal (such as providing beer with dinner, selling cups to fill with free beer or charge for a band or other entertainment and “give away” the alcohol, etc.) or to be frequenting a place of illegal activity such as a party where alcohol is being served illegally.

## Guideline for Parties & Special Events

The following is a list of suggestions for all Whitewater residents regarding hosting parties:

- Visit surrounding neighbors, be friendly, and make sure they know a couple of days in advance that a party will occur.
- Ask guests to respect the neighbors. The host is responsible for the condition of the neighborhood after the party.
- Do not advertise alcohol-related parties to the general public.
- Monitor your party. Keep it under control and make sure that volume levels do not cause a disturbance.
- Do not sponsor large open parties which tend to get out of control.
- Do not allow underage drinking.
- Do not carry open containers of alcoholic beverages beyond your private property. This is illegal in Whitewater even if you are over 21 years of age.
- Do not let anyone drive home under the influence of alcohol.

## Hydrant Flushing

The City's water main and hydrant flushing program takes place each spring and fall. Flushing of the water mains is necessary in order to continue to deliver clean, safe water to our citizens. Flushing of the water mains and hydrants can cause some discoloration in the water. Caution should be exercised in washing of white clothing. Discoloration in the water due to flushing WILL stain white clothing. We notify the public by using all local media; therefore, we cannot be responsible for stained clothing. If discoloration is detected, run the cold-water faucet until the discoloration clears. If reduced pressure is experienced after flushing, you may have to clean the aerators on your house faucets. If you have any questions, please contact the Water Utility at 262-473-0560.

## The valve on the street side of my water meter is leaking. Will the City repair it?

The City maintains the water line within the public road right-of-way and the meter itself. The rest of the system is the responsibility of the homeowner. The City does not provide repair service. The Utilities Division will shut off the water at the curb box if needed for a repair.

In an emergency situation, call the Water Works Department at 262-473-0560 or, if it is an evening or weekend, the Police Department at 262-473-0555, option 4 so a maintenance worker can be dispatched to shut off your water. If your repair is not an emergency, please call the Water Works Department at least 24 hours before the repair is to be made to schedule the water shut off.

The curb box will be located ahead of time and checked for operability. A maintenance worker will meet with you or your representative at the scheduled time to shut off the water.

## Discolored Water or Unpleasant Odors

Iron and manganese, which occur naturally in well water, can cause a rusty color. The City has pressure iron filters at the source to remove iron. It is not harmful. Run your water until it clears.

An unpleasant odor (usually described as smelling like rotten eggs) is almost always a problem with the water heater. A heating anode in the unit may be the culprit. Consult your plumber.

More information about the Water Department is available at: [www.whitewater-wi.gov/257/Water-Utility](http://www.whitewater-wi.gov/257/Water-Utility)

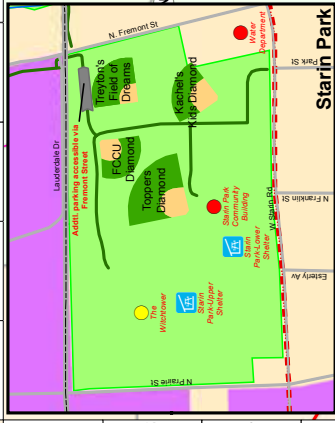

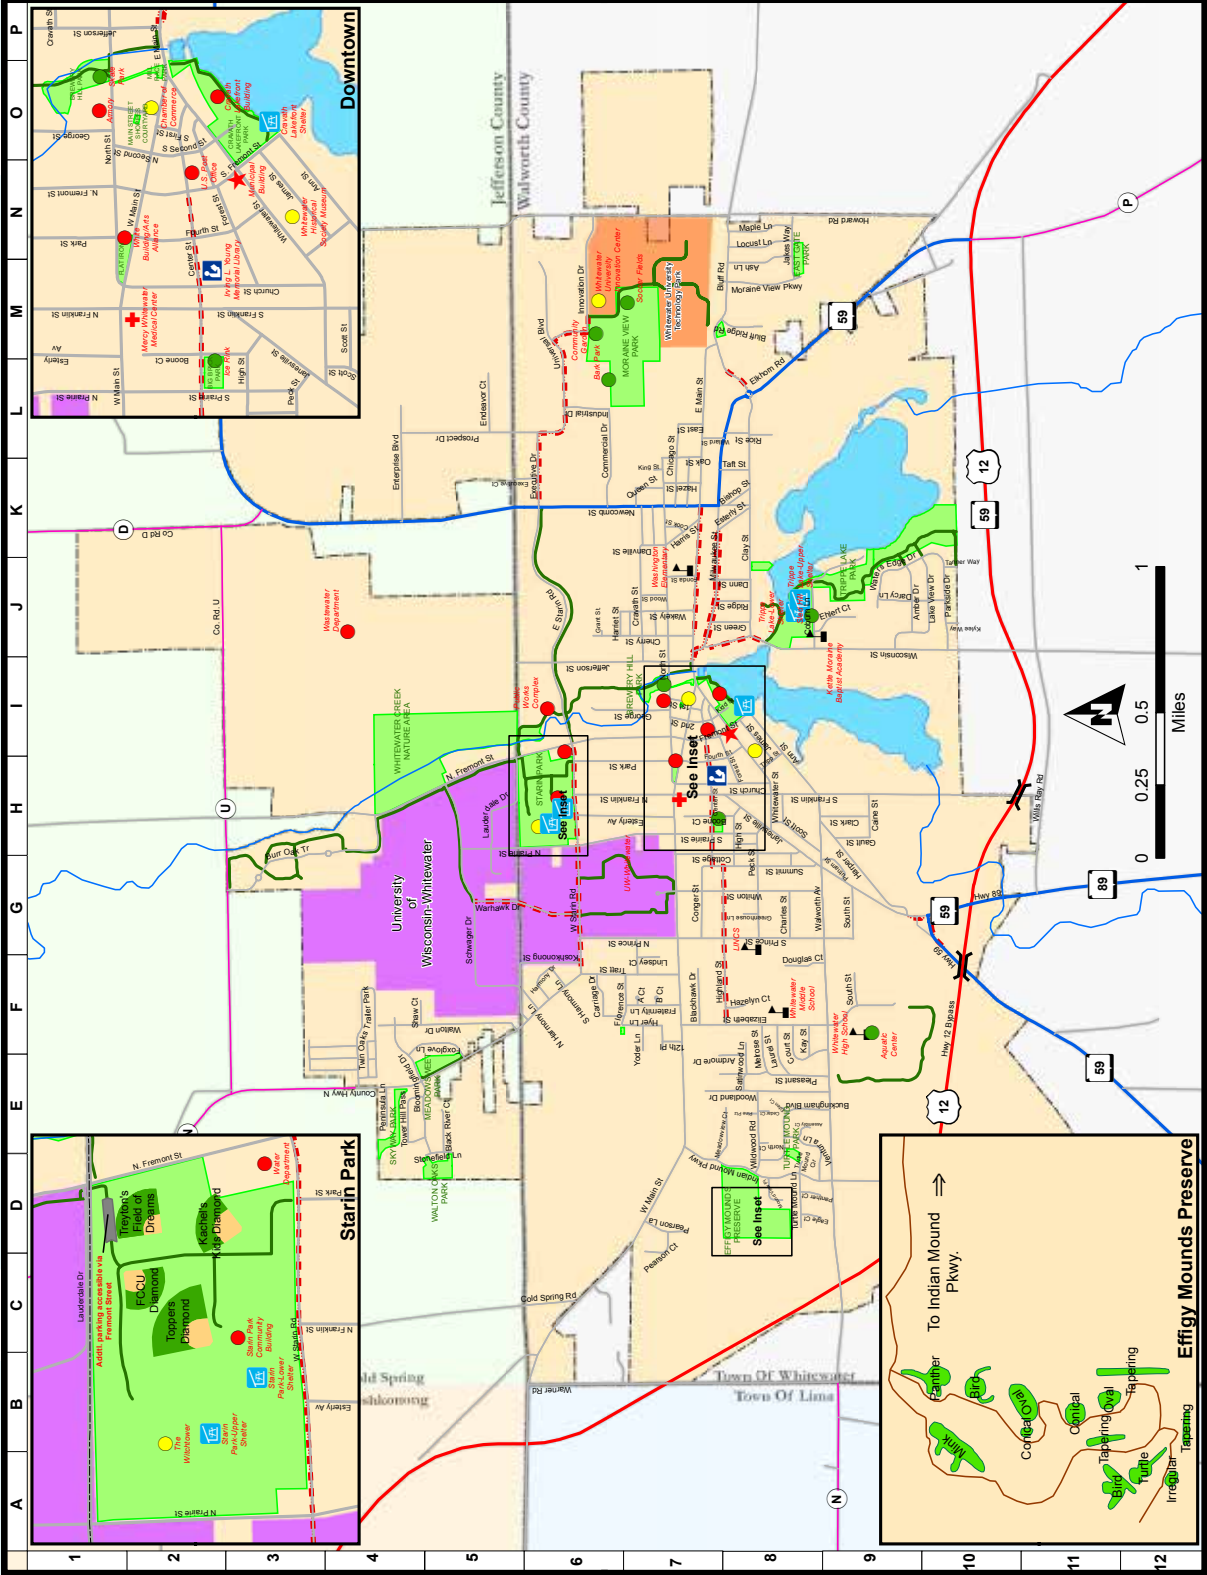

## Snowbirds: Winterize Your Home When You're Away

If you are a snowbird heading south for the winter, there are several key things you can do to help protect your water supply in your home. One is to consider completely turning off your water supply if you will be away for an extended period of time. Contact the Water Utility at 262-473-0560 for more information on this option. Otherwise, make sure to keep your home and plumbing warm if your water supply stays on during the winter months.
